

# Marine (Marine Coal Auger Sampling System)

Johnson Industries is proud to introduce a coal auger sampling system known as the UNI-SAMPLER, which has gained a worldwide reputation. Two of the largest coal sampling lab companies in the world have become loyal customers of this super-fast sampling system. Johnson Industries Uni-Samplers successfully operate across the United States, as well as in China, India, the Ukraine, and Russia.

As with any commodity, the coal consumer and supplier want to be assured they are receiving and supplying the correct quality of product. The Marine Uni-Sampler was developed to retrieve coal samples for testing from river or ocean barges.

Featuring a simple, rugged design, and rapid initial installation, the Marine Uni-Sampler from Johnson Industries is a great sampling solution currently used on the Mississippi River.

## Uni-Sampler - Marine Coal Auger Sampling System

### Equipment Specifications

- Rugged Design
- Diesel Powered System
- Self Propelled or Tug Boat Propelled
- Programmable Joystick Controls
- Standard 35' Boom
- Standard 12' Penetration
- Typically Samples a 200' Barge in 15 mins.
- Reject Falls Back Into Barge
- Only 2 Operators Required
- 3 to 4 pounds of coal taken per penetration
- No conveyor belts or shaker tables required
- Primary splitting, crushing, and secondary sampling are done at the auger assembly

### Standard Dimensions:

- Contact us with your requirements so we can build to your specifications.  
Call Today! **(606) 639-2029**

### Operator Cab Contents:

- Heating & A/C
- Heavy door with padlock
- Lighting
- All boom controls
- Sample access
- Sample storage

### Proudly Used In These Industries:

- Mining Industries
- Coal Mining
