

Linear (Sample Collector)

In instances where samples collected need to be sorted by vendor, a dividing storage system is needed. Johnson Industries provides both linear and carousel sample collecting systems. The linear system is a linear indexing machine with heavy duty plastic containers. The linear system can be built to accommodate 2 to 8 vendors. The system can be operated locally or remotely.

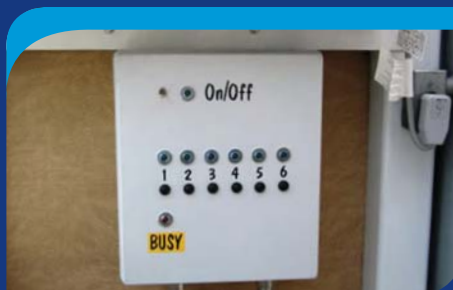

Featuring a simple, rugged design, and rapid initial installation, the Linear Sample Collector from Johnson Industries is a great solution used around the world.

Linear Sample Collector

Equipment Specifications

- Push button control
- Driven by linear actuator
- PLC controlled
- Strong Plastic Containers with Handles
- Stainless Steel Construction

Standard Dimensions:

- Depends on the number of canisters needed. Contact us with your requirements so we can build to your specifications. Call Today! **(606) 639-2029**

Available Options:

- Can build for 2 to 8 Canisters. Contact us with your requirements so we can build to your specifications. Call Today! **(606) 639-2029**
- Touch screen display

Industries Used Or Can Be Used:

- Mining Industries
- Salt Mining
- Coal Mining
- Molybdenum Mining
- Zinc Mining
- Potash Mining
- Gold Mining
- Rock Mining
