

AC Super Trac

The Super Trac was designed for underground mines with rails. The 12 inch wide tires allow the Super Trac to transport miners on and off the track for more versatility. The AC Super Trac is the same dependable personnel carrier, but with more run time and power. The Super Trac is commonly built for 42 inch and 48 inch gauge track, but it can be built to any reasonable gauge.

The Super Trac can easily transport 2 to 3 people through underground mines. Featuring a 9 HP three phase AC motor, the Super Trac mining vehicle can travel from speeds of 0 to 11 miles per hour. Equipped with great features such as front and rear lights, rear disc brakes with a drum parking brake, and low effort, high ratio steering, the Super Trac is perfect for your mining needs. Johnson Industries' Super Trac is the ideal underground mine vehicle and is or can be used around the world in salt mines, coal mines, molybdenum mines, zinc mines, potash mines, gold mines, rock mines.

If you have an underground mine with rails, you need Johnson Industries' Super Trac mining vehicle to safely and efficiently transport your miners on and off the track. Equipped with (10) 6V batteries, and with the included quick charger, we will never leave your miners walking.
